## **DETAILED ACTION**

1. This Office action is in response to the Amendment filed 5/3/2007.

## Allowable Subject Matter

- 2. Claims 1-21 are allowed.
- 3. The following is an examiner's statement of reasons for allowance: Applicant amended Claim 1 to further limit the layer of material having an imageable surface to be one of a photocurable material, or uncured natural rubber, or an uncured synthetic rubber.

The closest prior art of record, Hatch [US5840386] discloses a method for producing a liquid transfer roll sleeve. Hatch discloses providing a mandrel and forming an inner skin, a compressible layer and a metal outer surface layer. Hatch discloses the "imageable surface" made of a metal material and does not forming the "imageable surface" of a photocurable material or a rubber. While it is known in the art to use an outer layer made of photocurable or rubber material for a print cylinder, it is not obvious to modify Hatch to include a photocurable or rubber outer layer. None of the prior art of record, including Hatch, provides any suggestion or motivation for substituting a photocurable or rubber layer for the metal layer of Hatch. Hatch discloses the inner layers of the sleeve as required by Claim 1, however Hatch does not provide any suggestion or motivation to use the disclosed inner layers in another sleeve that would have an outer layer of the claimed materials.
